ABOUT US

Starting around 2018, Asasa Voltaic Private Limited has been idealizing the art and science of power safety to deliver a range of product contributions unrivalled in the realm of quality and value. We registered Incorporation in 2022 at Hyderabad. Intensely future-oriented while never losing sight on the past, we are a reliable voltage optimization expert delivering trusted power solutions to Homes, Business Sectors, and commercial areas – to all power usage sectors.

Asasa Voltaic Private Limited lies in the efforts put in for every minute detail which culminate into flawless product which are unique, innovative and easy to use. The team is committed to understand and meet the needs of the Customers. Creating dynamically comprehensive and technologically advanced products for the use of 'Common Man' and thus making their life safer and easier has been distinctive feature of this growing organization.

Quality has been the focus of management since inception and supplying quality products at a competitive price still remains the major objective of the company. All the departments of the company are certified to ISO 9001:2015, GMP (Good Manufacturing & Practice), C E, ROHS.

Our Products:

Single - Phase Asasa Power Device

Three - Phase Asasa Power Device

Thanking You...!

Yours Sincerely

P. SAIDULU

Managing Director

Our Products:

Single - Phase Asasa Power Device

Three – Phase Asasa Power Device

Asasa Safety Plus Power Device is designed with high precision microcontroller based auto control technology. This will provide protection for your family, property and all electrical appliances against short circuit power fluctuation scenarios.

Protects From:

- ✓ Protection from metal electrical shock.
- ✓ High and low voltage with automatic restart.
- ✓ Overload protection.
- ✓ Single Stabilizer for All Appliances.
- ✓ Spike and Surge protection with auto power on.
- ✓ Digital voltmeter and ammeter.
- ✓ Protection from Sudden Hazards

Shock Protections:

Electrical shocks are caused by direct and indirect contact. Direct contact means touching an exposed electrical wire. Indirect contact is when electrical current goes to earth wire via any conductive material that is water heater, iron box, geyser, grinder, motor etc. may carry current to earth through liquid or metal bodies.

Protections / Setting Parameters:

S. No	Parameter	Setting Range	Default setting	Trip Time Delay	DISPLAY
1	Earth Leakage	30 – 100 mA	30 – 150 mA	30 mA	ELS
2	High Voltage	260 – 285 V	285 V ± 2 V	Fixed	HI-U
3	Low Voltage	110 – 150 V	150 V ± 2 V	Fixed	LO-U
4	Electronic Overload	Fixed	26 Amps	1 min	BYPS
